

DISINFECTING PORTAL

LIDIT

La performance des espaces

A brand of ARECO

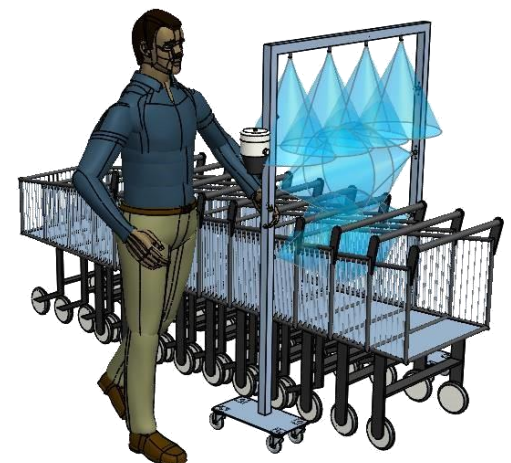

Fogging disinfection solution for shopping carts, pallets and cartons

The Principle

- ▶ Diffusion of a disinfectant through a stainless-steel misting gantry.
- ▶ A high-pressure metering pump propels the disinfectant through stainless steel nozzles generating very fine droplets that are deposited on the shopping carts and parcel pallets.

Precaution of use

- ▶ Wearing of PPE recommended: mask with visor, protective clothing, boots and gloves made of synthetic material (rubber or polyethylene).

Benefits

- ▶ No need for power supply, just water supply.
- ▶ Mobile system on wheels
- ▶ Fast decontamination speed: example 100 shopping carts in 1 minute
- ▶ Standard module (height: 5.25ft; width: 3,3ft) or made to measure
- ▶ Avoids disposable wipes and gloves
- ▶ Reduces cleaning labor

Delivered assembled and ready to be used by your teams
